

Here is the best routine I have found for growing hair & maintenance baths!

Make sure you use one of my codes for a discount when you order your products

STEPHANIE20 (20% off shampoos, etc.)

STEPHANIE10 (10% off brushes, etc.)

STEPHANIE6 (6% off tubs, dryers, etc.)

If you really want to grow hair quickly, step 1 will be a “pre bath” step

Pre Bath

- In a blender (I use a nutribullet) mix a splash of the pure mist, Elixir #4, and warm water until the mixture changes color and consistency.
- Wet down the dog in the bathtub with warm water. You want them wet to the skin, and the warm water will help open up their pores.
- Pour the blended mixture ALL over the wet dog, working it into the skin. You want the mixture to absorb into the skin, not just the hair.
- Wrap the dog in a towel and place in a crate for 15 minutes to allow the mixture to work its magic

Pure Mist

Elixir #4

<https://www.superiorcare.pet/collections/tauro-pro-line-elixirs/products/tauro-pro-line-pure-energizing-elixir-no-4-to-stimulate-coat-growth-for-dogs-and-cats>

Bath - Step 1 Shampoo

If you have done the pre bath instructions, then your dog will already be wet down and you can begin shampooing. If not, then wet down the dog with warm water and then shampoo the dog.

You are cleaning the skin, not just the hair. Make sure the dog is fully lathered and then rinse thoroughly.

Shampooing is done in two steps to clean out and clarify the pores and then help stimulate hair growth. There are a few different Step 1 shampoo options on the website, the two listed below are the ones I use the most.

Deep Cleaning Shampoo

<https://www.superiorcare.pet/collections/tauro-pro-line-shampoo-1/products/tauro-pro-line-ultra-natural-care-deep-clean-shampoo-for-dogs-and-cats-skin-and-coat-1?variant=43855858696439>

Healthy Coat Shampoo

<https://www.superiorcare.pet/collections/tauro-pro-line-shampoo-1/products/tauro-pro-line-healthy-coat-daily-care-shampoo-for-dogs-and-cats?variant=43277351977207>

Bath - Step 2 Shampoo

Once the dog is fully rinsed, shampoo again with one of the step 2 options. The two shampoos below are what I use the most. You can add more drops of Elixir #4 to your shampoo. If you do this, make sure you let the shampoo mixture sit/soak into the skin for a few minutes before you rinse. You are cleaning the skin, not just the hair. Make sure the dog is fully lathered and then rinse thoroughly.

Kertain Shampoo

<https://www.superiorcare.pet/collections/tauro-pro-line-shampoo-1/products/tauro-pro-line-healthy-coat-keratin-shampoo-for-dogs-and-cats?variant=42365976314103>

Healthy Coat Nourishing

Bath - Step 3 Mask/Conditioner

- In a blender (I use a nutribullet) mix a splash of the pure mist, 4 pumps of conditioner, and warm water until the mixture changes color and consistency.
- You can add Elixir #4 to this mixture also
- Pour the blended mixture ALL over the wet & fully rinsed dog, working it into the skin. You want the mixture to absorb into the skin, not just the hair.
- Let it sit for a few minutes, and then rinse thoroughly.
- I do use the elixir for show baths, but I will rinse out more of the conditioner before a show, I leave more conditioner in for maintenance baths.

Fur Growth Conditioner/Mask
